Dear Emory,

10/22/75

Your extremely valuable 10/16 came while I was in hospital. Heavy phlebitis. Has me on back & complete bedrest.

Call the stuff Gunn had forced out in C.A. 226-75. On appeal. They gave me enough to save the face of a partisan Judge but withheld proof they had not complied. Contempt & perjury. It will be an issue on appeal. I can now compare what you sent with what I got. I need it open in case the amended law was effective but I am sure they gave you what they did not give me. Do. This has greatly increased importance. I can now copy it if it is not coloring by which I'd appreciate an unbound duplicate for my lawyer. And each new paper current by because he must file the file Dow.

The FBI gave Gunn nothing. A mine in Austin, has given up picking crumbs up he did not. Nice & pale & dust & mice doing things out all the Def-Defense, new promotes. Need do is spend a stamp & duplicate the request. One of the bad Gunn makes a study in him. Don't trust Gunn but don't show it. He did not really level with you. Mr. Rec'd Kelley, as you'll learn soon from the about-to-appear Post Mortem (Spec. Investigation 660 pp.) If you want one & have a mailing label it may speed mailing up if you include one. I can look while flat on the back & this is one thing I've not have to do. I'll have almost all to do - alone.

You've got a live one this time. Keep after it & please keep the pretext prompting. The bureaucracy has stripped with help of us! Thanks much & best, Harold
